

Common sense features, uncommon quality

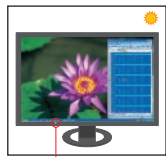

*The FlexScan S series are energy-saving and ergonomic monitors in 24.1" and 22" sizes with VA and TN panel technology. Designed for business use, they are also ideal for CAD and amateur digital photography.*

### Optimized Brightness with Auto EcoView

A sensor on the front bezel measures ambient light and optimizes the screen's brightness, ensuring that these monitors are never too bright or too dark. This results in improved ergonomics and reduced eye strain, while cutting power consumption by up to 51%.

Model	Auto EcoView OFF*	Auto EcoView ON	Power Reduction
FlexScan S2202W	38 W	23 W	39%
FlexScan S2233W	66 W	32 W	51%
FlexScan S2243W	69 W	36 W	47%
FlexScan S2402W	43 W	27 W	38%
FlexScan S2433W	71 W	40 W	43%

\* Figures assume monitors are set to the default factory brightness of 100%.

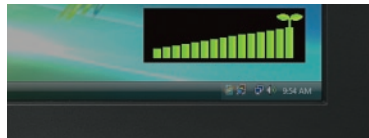

Auto EcoView Sensor

*Auto EcoView optimizes the screen's brightness to levels akin to viewing a sheet of paper under ambient light conditions.*

### Confirm Power Savings with EcoView Index

A user-activated on-screen index shows the level of power savings in correlation with the monitors' brightness to encourage environmental consciousness.

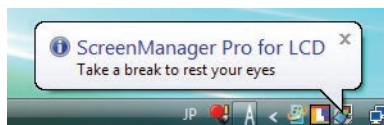

*When EcoView Index is fully illuminated, the monitor is operating at optimum energy efficiency.*

### EyeCare Mode

The FlexScan S2433W, S2243W, and S2233W incorporate EyeCare mode which helps to mitigate eye fatigue when working in very dim ambient light. With just a touch of a button, you can reduce screen brightness to a minimum of 4 cd/m<sup>2</sup>. EyeCare mode also works with the Auto EcoView function by automatically increasing or decreasing luminance to user-defined preset levels, thereby more accurately achieving ideal screen brightness in very dimly lit rooms.

### EyeCare Manager

EIZO's EyeCare Manager prompts workers to take scheduled breaks to avoid eye fatigue caused by prolonged monitor use. EyeCare also totals and displays on-screen the monitors' usage hours for each day and month to promote improved work habits.

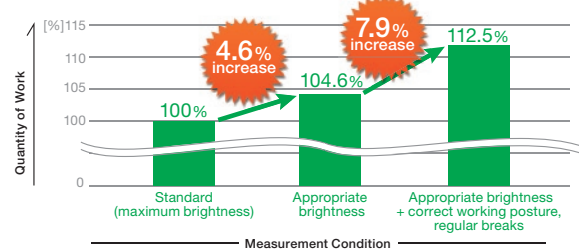

*EyeCare reminds workers to take regular breaks to prevent eye fatigue.*

### Improved Efficiency, Reduced Visual Fatigue

EIZO conducted a survey in 2008 to establish the relationship between eye fatigue and monitor use. Results showed that features like Auto EcoView, ergonomic stands, and the EyeCare Manager helped reduce eye fatigue and improved work efficiency by 12.5%.

For a white paper regarding this study please visit [www.eizo.com/global/support/wp/pdf/wp\\_08-001.pdf](http://www.eizo.com/global/support/wp/pdf/wp_08-001.pdf)

#### Increases in Quantity of Monitor Work

### Zero Watts When Turned Off

The power save mode and off timer on these monitors reduces their energy consumption to less than 1.5 watts. When turned off via the main power switch, they consume no electricity at all.

### Preset Modes for Optimum Viewing

EIZO's Fine Contrast function has six preset modes: Text mode for office applications, Movie mode for video, Picture mode for graphics, sRGB mode for web browsing, EyeCare mode for use in very dimly-lit environments, and Custom mode for user-defined settings.

### Compact, High Resolution Screen

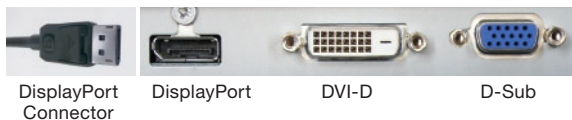

The FlexScan S2243W features a 16:10 aspect ratio with a 1920 × 1200 native resolution. Thanks to its 0.247 mm pixel pitch and display of 103 pixels per inch, it shows 30% more information than a typical 22" monitor with a 1680 × 1050 resolution. The FlexScan S2243W displays the same amount of information as a typical 24.1" monitor, but occupies 10% less desk space. This is ideal for offices or trading floors where a 24.1" monitor is desired, but cannot be installed due to space constraints.

*The FlexScan S2243W occupies 10% less desk space than a typical 24.1" monitor, but displays the same amount of information.*

## Next Generation Connectivity

The FlexScan S2402W and S2202W come with DVI-D (digital) and D-Sub (analog) inputs while the other three models also include a DisplayPort (digital) input. With DisplayPort, audio and video signals are transmitted via a single, high-bandwidth cable at distances up to 15 meters without any signal degradation.

## DVI Input Level Adjustment

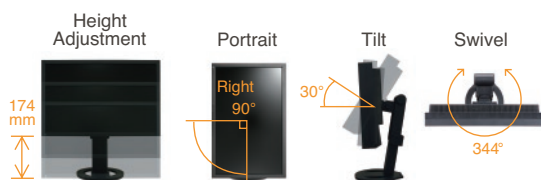

Compensates for degradation of image quality that may occur when connecting a monitor with a signal switch box or via a long cable.

## Individual Adjustment of Gamma

To provide better image consistency in multi-monitor environments, EIZO performs advanced gamma adjustment at the factory, which minimizes discrepancies among monitor gamma characteristics.

## Placement Flexibility

All models except the FlexScan S2202W come with the highly versatile FlexStand (shown below) which offers tilt, swivel, portrait rotation, and up to 174 mm of height adjustment. The FlexStand S2202W comes with a stand that features 100 mm of height adjustment, tilt, swivel, and portrait mode.

## Power Management Software

EIZO EcoView NET software allows your organization to reduce its electric bills while minimizing its burden on the environment by centralizing control over the power settings of monitors on a network. For FlexScan S series and other EIZO monitors that support DDC/CI, you can adjust the brightness, turn the Auto EcoView function on and off,

## Wide Color Gamut / EasyPIX Compatibility

The wide color gamut of the FlexScan S2243W and S2233W reproduces 95% of Adobe RGB, while that of the S2433W reproduces 96% of Adobe RGB. Compatibility with the optional EIZO EasyPIX accessory allows for simple color matching between monitor and photo prints.

and lock the control buttons to prevent tampering with screen settings. You can also switch a PC's primary power and a monitor's secondary power on and off regardless of the manufacturer.

For details see [www.eizo.com/global/products/accessories/flexscan/ecoview\\_net/index.html](http://www.eizo.com/global/products/accessories/flexscan/ecoview_net/index.html)

## Organize Applications with EIZO ScreenSlicer

This bundled software utility lets you more effectively use your screen through partitioning. Simply drop your windows into configurable partitioned areas and they will be aligned instantly (Windows 7, Vista, and XP compatible).

## ScreenManager Pro for LCD and ScreenTuner

Developed for Windows and Mac OSes respectively and available from [www.eizo.com](http://www.eizo.com), these two free applications let you adjust your monitor's color with your mouse rather than the OSD menu buttons. With ScreenManager Pro for LCD you can also assign a preset mode to a specific application so that mode becomes active whenever the application is in use.

## Commitment to Quality

While outsourcing production is now common practice in the monitor industry, EIZO continues to manufacture its products the same way it has throughout its 40

year history — with its own staff at its own factories. This allows EIZO to keep close control over production quality and offer the industry's only 5-year manufacturer's limited warranty.

## Customer Assurance

EIZO strives to create a better work environment by complying with strict environmental performance requirements for low energy consumption, product and package recyclability, and manufacturing processes, as well as specific ergonomic and functional conditions. This has earned all monitors in this brochure the TCO Displays 5.0 certification.
